

## Water Mark Image on PDF –Readme

### Bot Overview

This bot performs the following:

- This bot Adds Water Mark Image to PDF File.
- It's time consuming process to add water marks to each PDF when the PDF's are available in bulk, Especially when those PDF's are generated/converted from other format like image(jpg/png..).
- So by using this bot as a STUB all the PDF's can be water marked within minutes.
- We can change the Position of the Image based on Client Requirement .
- Image Size Should be Maximum of 100\*84

### Prerequisites

- Automation Anywhere Enterprise v10.7 & above

### Installation

- Download the bot from Bot Store.
- Double click on the .msi file.
- On Welcome to Installation wizard, click Next to continue.

| vSnapshotFolder      | String | Input     | This folder contains Screenshot in case of error (Already defined, no need to add value unless want to change location of file).                                |

### Error Handling

- Each Bot folder contains the below hierarchy.
  - Error Folder
    - Logs
      - Error Logs Month-Day-Year.txt: In case of any error, this file logs error message along with time stamp
    - Snapshots
      - Error Snap Month-Day-Year.png: In case of any error, this file captures screenshot of error.
- Task Status of bot is set to failed in case of errors.
