1. Introduction

This document contains all essential information for the user to make full use of the State Medical License Search Bot or Digital Worker. Included are descriptions of the functions, capabilities, and step-by-step procedures for setup and configuration of the Bot.

Overview

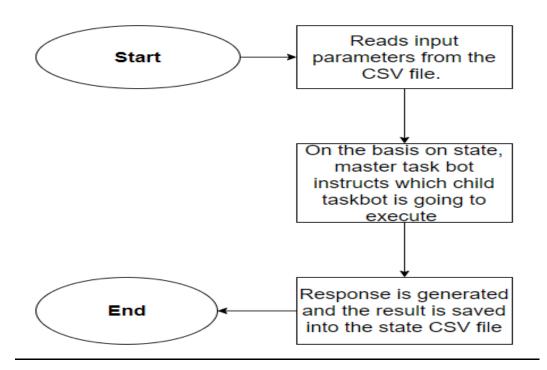

This Bot takes the license number, issuing state, and physician's first and last names from an input CSV file, fetches information about the physician from the respective state medical board, and saves the result to an output CSV file that is unique to each state.

Detailed steps are as follows:

MedicalLicenseSearch

- 1) User provides the first name, last name, issuing state (from the list of states covered by this bot), and license number of the physician in the input CSV file, which contains both required and optional parameters.
 - Required Parameters in the input CSV file.
 - Optional Parameters in the input CSV file.
- 2) A master task bot runs a state-specific task bot and the result is saved to the state-specific CSV file.

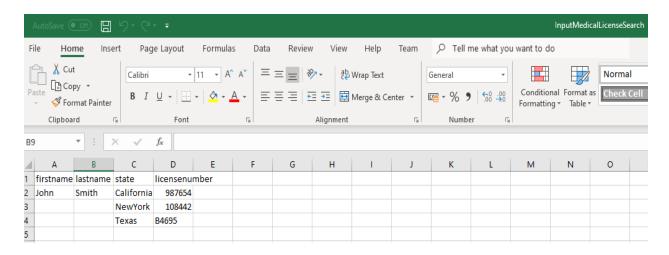

1) Visual Flow -

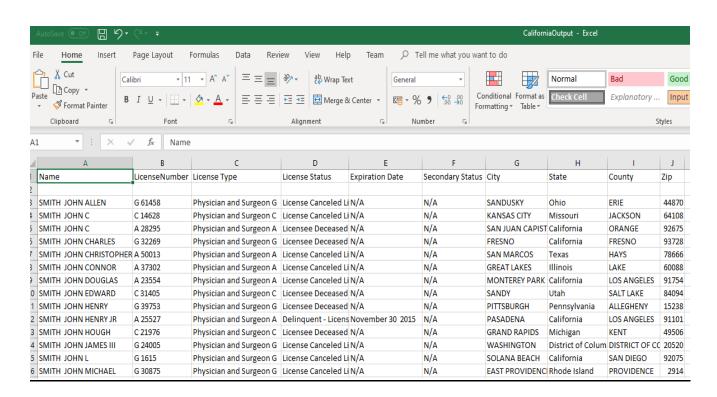

2) Input and Output Example -

Input: InputMedicalLicenseSearch.CSV

Output: CaliforniaOutput.CSV

Common Use cases

The fields in the <u>CSV</u> can be changed to whatever data needs to be searched.

- ➤ Verify State Medical Licenses for following states:
 - California
 - New York
 - Texas
 - Virginia
 - Georgia

2. Requirements & Prerequisites

System Requirements

For the PC or server where the bot needs to run:

- ✓ RAM: 8GB or higher
- ✓ Processor: Intel Core i5 or higher and equivalent for any other OS
- ✓ Hard Disk: Up to 2GB of overall free space in the AA Client installation drive

Reference below for Enterprise Client & Control Room system requirements.

Prerequisites

- ✓ Software needed -
- ✓ AA Enterprise Client 11.x
- ✓ AA Enterprise Control Room 11.x

Security Measures

There are some security best-practice recommendations that you should follow with your bot.

3) Do not provide admin access to the Windows User Account executing the Bots, to avoid unintended data changes within the <u>CSV</u> Template.

3. Getting Started

Skill Matrix

The functionality of the Bot has been divided into a set of skills.

Below is an overview of how the task bots map to these skills:

Medical License Search.atmx	NewYorkLicense.mbot
California License Search.atmx	
Georgia License Search.atmx	
Texas License Search.atmx	
Virginia License Search.atmx	
New York License Search.atmx	
C T	California License Search.atmx Georgia License Search.atmx Texas License Search.atmx Virginia License Search.atmx

Installation Hierarchy

Once the bot is downloaded and installed, the installer creates the files in the folder structure as shown below.

Folder Structure on your Machine

Folder Structure on your Machine			
Folder Structure	Description		
< <u>AA Application Path</u> >	<aa application="" path=""> is the location where AA files are stored on your machine</aa>		
1. My Tasks	1. My Tasks		
	My Task Folder is the default directory where bot files are saved.		
1.1. Bot Store	1.1 Bot Store Bot Store Folder contains the Bot Name Folder which the installer creates during		
1.1.1. State Medical License Search-AutomationAnywhereError Folder	installation of the bot. 1.1.1. State Medical License Search- Automation Anywhere		
 Logs Error logs Month-Day-Year Hour Min Sec.txt Snapshots 	This folder is created by the installer and contains files and folders needed for bot execution: Fror folder is where logs and snapshots of screens will be placed if something goes		
 Error Snap Month-Day-Year.png 	wrong during execution ➤ Input Folder is where the input files that the		
Input FolderInputMedicalLicenseSearch.CSV	bot needs for execution of the use case are saved • InputMedicalLicenseSearch.CSV		
Output FolderCaliforniaOutput.CSVGeorgiaOutput.CSV	provides first name, last name, license number and state of physicians		
 NewYorkOutput.CSV TexasOutput.CSV VirginiaOutput.CSV My Tasks Medical License Search.atmx California License Search.atmx 	 Output Folder is where the output files that the bot needs for execution of the use case are saved CaliforniaOutput.CSV provides details of physicians licensed in California NewYorkOutput.CSV provides details of physicians licensed in New York 		
 New York License Search.atmx Texas License Search.atmx Virginia License Search.atmx Georgia License Search.atmx 	 TexasOutput.CSV provides details of physicians licensed in Texas VirginiaOutput.CSV provides details of physicians licensed in Virginia GeorgiaOutput.CSV provides details of physicians licensed in Georgia 		

2. My MetaBots	
NewYorkLicense.mbot	➤ My Tasks folder contains all the Developed Platform Source Code ➤
	My MetaBots folder contains the Developed Metabots needed for bot execution.

Quick Start

3.1.1 **Setup**

STEP 1 (Configuring Parameters with an External File)

External file can be configured at -

AA Application Path > My Tasks > Bot Store > State Medical License Search-Automation Anywhere> Input Folder>InputMedicalLicenseSearch.CSV

AA Application Path > My Tasks > Bot Store > State Medical License Search-Automation Anywhere > Output Folder > CaliforniaOutput.CSV

AA Application Path > My Tasks > Bot Store > State Medical License Search-Automation Anywhere > Output Folder > NewYorkOutput.CSV

AA Application Path > My Tasks > Bot Store > State Medical License Search-Automation Anywhere > Output Folder > TexasOutput.CSV

AA Application Path > My Tasks > Bot Store State Medical License Search-Automation Anywhere > Output Folder > VirginiaOutput.CSV

AA Application Path > My Tasks > Bot Store > State Medical License Search-Automation Anywhere > Output Folder > GeorgiaOutput.CSV

Below is a table that summaries what each variable name is, what it does, and an example of the input:

Medical License Search

Variable Name	Туре	Mandatory (Yes/No)	Purpose	Example Input
vFirstName	Text	No	First name of physician, taken from input CSV file	John
vLastName	Text	No	Last name of physician, taken from input CSV file	Smith
vState	Text	Yes	State issuing physician's license, taken from input CSV file Accepted values: California New York Texas Virginia Georgia	Texas
vLicenseNumber	Text	No (Required in case of New York)	License number of physician, taken from input CSV file	B11111

Note: Both license number and (first name and last name) are used to identify the physician. So in one row of the input CSV file, either or both must be present.

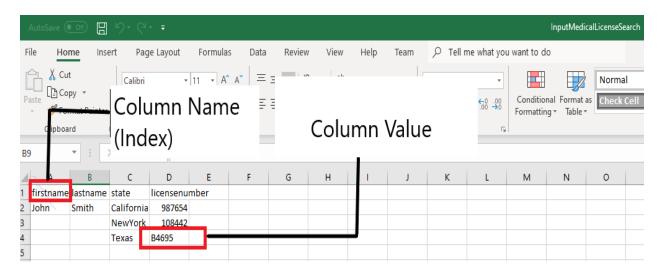

3.1.2 Guidance for configuring Filter conditions

a. Filter based on Column Value

Column Name is the header text that is present in the first row of the CSV file. Please do not delete or alter the Column Name.

Column Value is the value which needs to be matched against the Column Name. You can add or delete parameters as per your requirements.

Example

► Input CSV File-

InputMedicalLicenseSearch.CSV

Required parameters:

File Parameter Name	Туре	Description	Example Input
state	Text	State issuing physician's license	California
		Accepted values:	
		California, New York, Texas, Virginia, and Georgia	

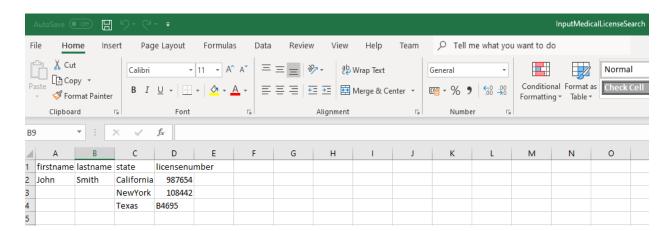

• Optional Parameters -

(If you don't want to add any value in the parameter leave it empty)

File Parameter Name	Туре	Description	Example Input
firstname	Text	First name of physician	John
lastname	Text	Last name of physician	Smith
licensenumber	Text (Required if state is New York)	License number of physician	B11111

Example:

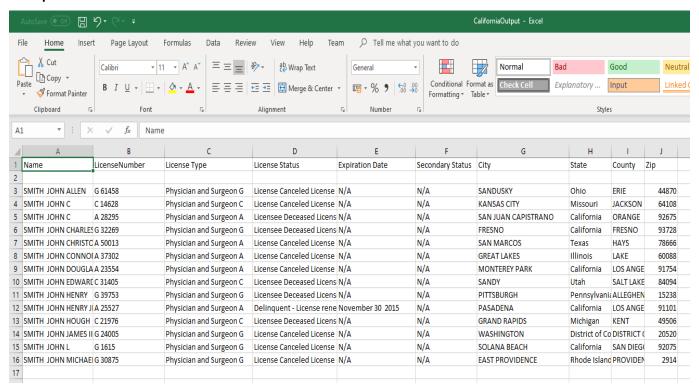

Output CSV Files-

CaliforniaOutput.CSV

File Parameter Name	Туре	Description	Example Output
Name	Text	Name of physician	Smith John C
License Number	Text	License number of physician	G 11111
License Type	Text	License type	Physician and Surgeon G
License Status	Text	Status of license	License Cancelled - License has been voluntarily cancelled or the license has been expired for at least five years and has not been renewed. No practice is permitted.
Expiration Date	Text	Expiration date of license	November 30 2015
Secondary Status	Text	Administrative action taken by other state or federal government	Probation Completed
City	Text	Home city of physician	PASADENA
State	Text	Home state of physician	California
County	Text	Home county of physician	LOS ANGELES
Zip	Text	Zip code of home city	91101

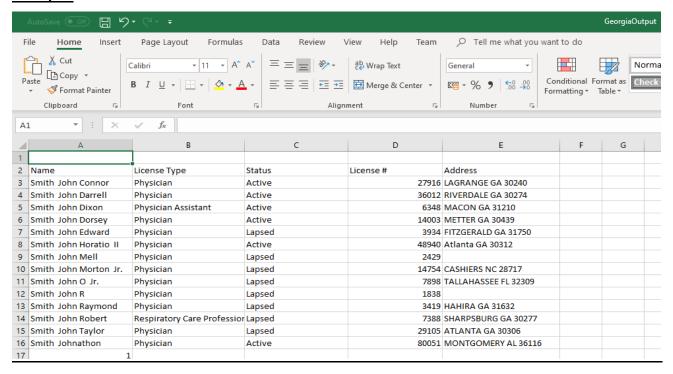

Example:

GeorgiaOutput.CSV

File Parameter Name	Туре	Description	Example Output
Name	Text	Name of physician	Smith John C
License Type	Text	License type	Physician
Status	Text	Status of license	Active
License #	Text	License number	27916
Address	Text	Address of physician	LAGRANGE GA 30240

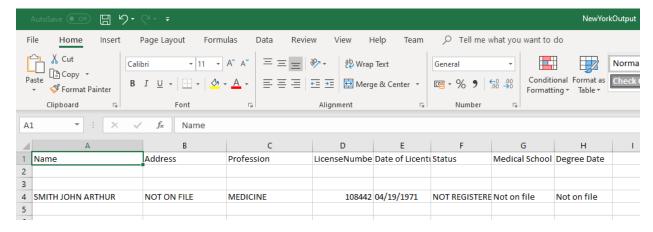

Example:

NewYorkOutput.CSV

File Parameter Name	Туре	Description	Example Output
Name	Text	Name of physician	Smith John C
Address	Text	Address of physician	NEW YORK NY
Profession	Text	Profession of physician	Medicine
LicenseNumber	Text	License number	234567
Date of Licensure	Text	License issue date	02/08/2001
Status	Text	Status of license	LICENSE REVOKED
Medical School	Text	Medical school of physician	SUNY BUFFALO
Degree Date	Text	Degree completion date	06/01/1989

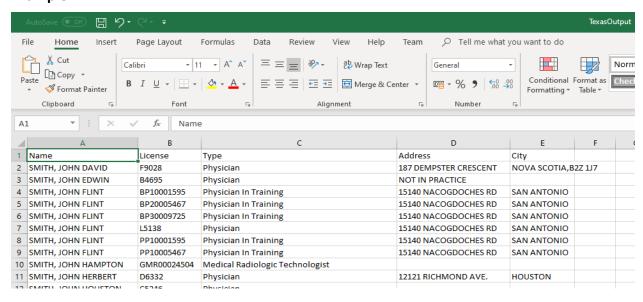

Example:

TexasOutput.CSV

File Parameter Name	Туре	Description	Example Output
Name	Text	Name of physician	Smith John C
License	Text	License number of physician	F11111
Туре	Text	Physician type	Physician
Address	Text	Address of physician	123 DEMPSTER CRESCENT
City	Text	Home city	SAN ANTONIO

Example:

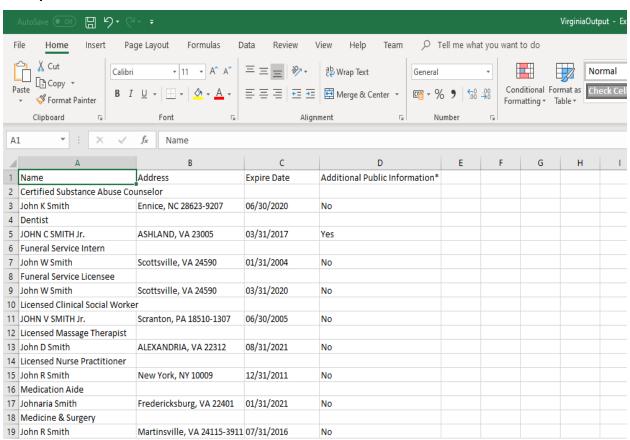

VirginiaOutput.CSV

File Parameter Name	Туре	Description	Example Output
Name	Text	Name of physician	Smith John C
Address	Text	Address of physician	123 DEMPSTER ROAD
Expire Date	Text	Expiry date of license	06/30/2020
Additional Public Information	Text	Additional information about physician	(None)

Example:

4. Reports

There are no Bot Insight Reports generated for this Bot.

5. Logs

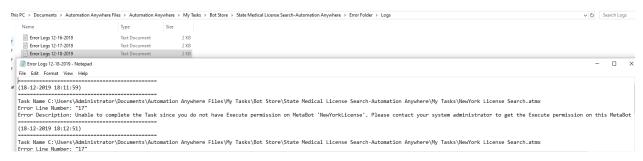

In case of Errors, Error Logs & Screenshots are generated within Error Folder (Highlighted below in yellow)

- My Tasks
 - Bot Store
 - Bot Name
 - o Error Folder
 - Logs (Folder)
 - Error Logs Month-Day-Year Hour Min Sec.txt
 - Snapshots (Folder)
 - Error Snap Month-Day-Year.png

Error Logs will contain the below information -

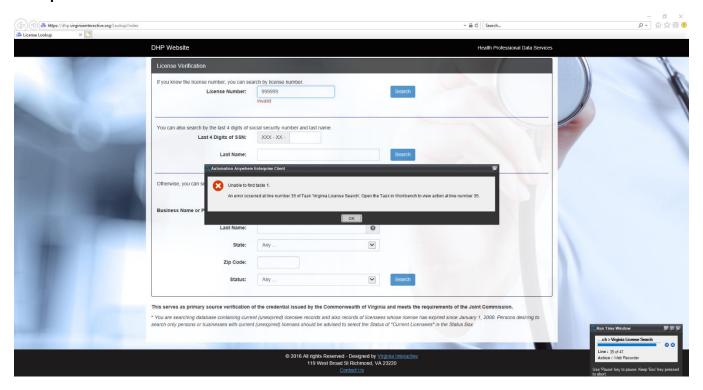

- Generated Timestamp
- Task Name
- Error Line Number
- Error Description

Example:

Example

Note: There are no Custom Logs generated for this Bot.

6. Troubleshooting & Support

Support

Free bots are currently not supported directly.

Questions on Bot Functionality or Feature can also be posted to our Community site Apeople

Automation Anywhere provides a <u>Product Documentation portal</u> which can be accessed for more information about AA's products and guidance on building bots and Digital Workers.

The "Build" section of the portal includes these sections:

- Getting Started information on building bots recommended practices (including use of the Credential Vault)
- Build Advanced Bots details on MetaBots and the approach to integrating code into them
- Build Digital Workers high level architecture

FAQs

Q: The 'Create Locker' button is not visible in the Credential Vault Page. What do I do?

A: Please check if the role 'Locker Consumer' is assigned to the user and you are using an Enterprise Client version.

Appendix A: Record of Changes

No.	Version Number	Date of Change (DD/MM/YYYY)	Author	Notes
1	1.0	16/12/2019	Automation Anywhere	Version 1 Release
