<u>**Text classification for emails, SMS, tickets – Readme**</u>

Bot Overview

This bot performs the following:

Identifies spam messages among SMS from an excel file with AI and marks them in the same file.

Prerequisites

- Automation Anywhere Enterprise v11.3

Installation

- Download the bot from Bot Store.
- Double click on the .msi file.
- On Welcome to Installation wizard, click Next to continue.
- Click I agree to the terms in the license agreement radio button to accept the agreement.
- Get/Copy the License key from Bot Store Downloads into License Key, click Next to continue.
- Click Install to begin the installation.
- Click Finish to complete the installation.
- To view the installation, go to 'My Tasks' folder on AAE Client to see bot files.

Uninstall

- Open Add/Remove Programs -> Select the Bot/Digital Worker to be uninstalled
- Click uninstall

Creates the following folder structure of the content in the AA Dir:

<AA Directory>
  o My Tasks
    ▪ Bot Store
      • Text classification for emails, SMS, tickets - Almato AG (Folder)
        o My Tasks
          ▪ AlmatoOneClassifier_SMS Spam Filter-Almato.atmx
        o Error Folder
          ▪ Logs (Folder)
            • errorlog.txt
  o My Metabots
    ▪ AlmatoONEClassifier.mbot

How to Use the Bot:

Use the following information to configure your bot:

Parameter Name	Type	Direction	Additional Info
vInputFolder	String	Input	This folder contains the input excel file which is manipulated by the bot (already defined, changes can be made but are not necessary)
vInputFile	String	Input	The path and filename of the input excel file. The variable is already defined for the included demo file.
vErrorFolder	String	Input	This is error folder inside bot folder which contains Logs folder (Already defined, no need to add value unless want to change location of file).
vLogFolder	String	Input	This folder contains Log file in case of error (Already defined, no need to add value unless want to change location of file).

Error Handling

- Each Bot folder contains the below hierarchy.
    - Error Folder
        - Logs
            - errorlog.txt: In case of any error, this file logs error message along with time stamp
- Task Status of bot is set to failed in case of errors.
