

## **\*\* System Clean Up Process Flow \*\***

### **\*Prerequisite:**

1. Application excel file have names of applications that need to be close.
2. Closing applications need to be installed in the system where the bot is running.
3. You can change the excel path if required.

### **\*Key Points:**

1. Make sure that, the application name must have the .exe extension with the name.
2. Make sure that, the application is listed in excel which you need to close.

### **\*The steps followed in Automation Anywhere:**

1. Bot will open the excel where the application name listed.
2. Bot will kill the applications in loop.
