1. Introduction

This document contains all essential information for the user to make full use of this *A2019 – Currency Conversion Assistant*. It includes a description of the functions and capabilities and step-by-step procedures for setup & configuration of *Currency Conversion Assistant*.

1.1 Overview

This automation provides a simple and easy to use interface to convert currencies at different values. It fetches real-time values from the website ***<https://www.x-rates.com/>***

1.2 Use cases

The key use cases include:

Many business processes which deal with Foreign exchange would need constant reference to real time currency rates and their conversion. This bot solves the problem by allowing users to select desired source and target currencies from the drop down and specify the amount in the text box as shown below and just hit convert to get the value at latest rates.

The screenshot shows a web application titled "Currency Conversion Assistant". It features a clean, modern interface with a light gray background. The main content area is divided into several sections: a "Select Base Currency" dropdown menu with "INR" selected, a "Select Target Currency" dropdown menu with "USD" selected, an "Enter Amount" text input field, and two blue buttons labeled "Click to Convert" and "Click to Exit". Below these is a "Result :" label followed by a text input field for the conversion result. The interface is enclosed in a dark gray header bar with the application title and standard window controls (minimize, maximize, close).

2. Requirements & Prerequisites

2.1 System Requirements

Enterprise A2019 (Cloud deployed) and Community Edition device requirements.

Review the machine hardware specifications, operating system versions, and browser types supported by Automation Anywhere Enterprise for creating and running bots and command packages as an Enterprise A2019 (Cloud deployed) or Community Edition user on your local machine.

2.2 Prerequisites

User should have a **A2019** installed to take a benefit of this automation.

User should have access to the website <https://www.x-rates.com/> in order to retrieve real time data.

3. Getting Started

3.1 Quick Start

3.1.1 Configuration and Use

- Download the Bot from the Bot-store.
- Check the downloaded bot in your local machine private/Public section.
- Once Bot is downloaded you are good to go for a run.

- For Configuring the Bot –

INPUT VARIABLES: Input Variables to be mentioned in this Table				
Variable Name	Type	Mandatory	Purpose	Example Input
N/A	N/A	N/A	N/A	N/A

4. Support & FAQs

4.1 Support

Free bots are not officially supported. You can get access to Community Support through the following channels:

- You can get access to Community Support, connecting with other Automation Anywhere customers and developers on [APeople](#) – the [Bot Building Forum](#), the [Bot Store Support Forum](#), or the [Developers Everywhere Group](#).
