## **1. Introduction**

---

This document contains all essential information for the user to make full use of this A2019 Bot. It includes a description of the functions and capabilities and step-by-step procedures for setup & configuration of the Bot.

### **1.1 Overview**

This bot performs the following action:

- This bot will return cities as output of a country given as input.

### **1.2 Use cases**

The key use cases include:

This Bot can be used to find out the prominent cities of a country.

This Bot can be used as an alternate to any API / 3rd Party Tool to find cities of a country.

---

## 2. Requirements & Prerequisites

---

### 2.1 System Requirements

The Bot will work on Pure Cloud, Cloud-Enabled and Fully On-Prem deployment.

Operating system supported are Microsoft Windows (Windows 7/8/10 and Windows Server 2012/2016/2019) and Linux (Linux CentOS 7.7, Red Hat Enterprise Linux 7.7)

Enterprise A2019 can be hosted on AWS, Microsoft Azure, Google Cloud, IBM, and any public, private, or hybrid cloud service.

Only 64-bit operating system version supported.

Bot Creator tasks are supported with all the listed operating systems.

You cannot register a device that is running on a Linux system. The Bot agent cannot be installed on Linux systems. However, you can use a registered device running on a Windows system to access an Enterprise Control Room that is installed on a Linux system.

Supported Browsers with versions are as below:

Google Chrome : 57 or later

Microsoft Internet Explorer : 11

Microsoft Edge based on Chromium : 79 or later

Machine hardware specifications are as below:

Processor	RAM	Storage (free disk space)	
Network			
Intel Core i3 2.6 GHz (Minimum)	4 GB (Minimum)	32 GB	5Mbps
64-bit higher (Recommended)	8 GB (Recommended)		20Mbps or

### 2.2 Prerequisites

Automation Anywhere A2019 Cloud / On Prem / Community Edition Version.

## 3. Getting Started

### 3.1 Quick Start

#### 3.1.1 Setup

Download the Bot in A2019 Edition of Automation Anywhere Cloud / On Prem / Community Edition Version to be ready to use from A2019.

#### 3.1.2 Configuration and Use

Bot named “Cities of a Country” is ready to use Bot.

For Configuring the Bot –

INPUT VARIABLES: Input Variables to be mentioned in this Table				
Variable Name	Type	Mandatory	Purpose	Example Input
dCountry	Dictionary/String	Yes	Input the value of country you want to find cities of	India

OUTPUT VARIABLES: Output Variables to be mentioned in this Table.				
Variable Name	Type	Mandatory	Purpose	Example Output
sCities	String	Yes	The resulting cities of the given country	New Delhi, Mumbai, etc..

Just give your input value as country in the Prompt for value from the country you want to find the cities of as output.
