# 1. Introduction

---

This document contains all essential information for the user to make full use of this [\*Automation360 – AARI for Web – Country’s National Flag Animation\*](#). It includes a description of the functions and capabilities and step-by-step procedures for setup & configuration of the [\*Automation360 – AARI for Web – Country’s National Flag Animation\*](#).

## 1.1 Overview

This Automation will create the animation of the country’s national flag which is available into the AARI web form by using the Python turtle module.

## 1.2 Use cases

The key use cases include:

A national flag is a flag that represents and symbolizes a given nation. It is flown by the government of that nation, but usually can also be flown by its citizens. A national flag is typically designed with specific meanings for its colors and symbols, which may also be used separately from the flag as a symbol of the nation. The design of a national flag is sometimes altered after the occurrence of important historical events. The burning or destruction of a national flag is a greatly symbolic act.

---

## 2. Requirements & Prerequisites

---

### 2.1 System Requirements

#### [Enterprise A2019 \(Cloud deployed\) and Community Edition device requirements.](#)

Review the machine hardware specifications, operating system versions, and browser types supported by Automation Anywhere Enterprise for creating and running bots and command packages as an Enterprise A2019 (Cloud deployed) or Community Edition user on your local machine.

### 2.2 Prerequisites

User should have a **A2019** installed to take a benefit of this automation.

User should have a AARI-Web access.

User should have a **Python-3** installed to take a benefit of this automation.

---

## 3. Getting Started

---

### 3.1 Quick Start

#### 3.1.1 Configuration and Use

- Download the Bot from the Bot-store.
- Check the downloaded bot in your local machine private/Public section.
- Once Bot is downloaded you are good to go for a run.

- For Configuring the Bot –

INPUT VARIABLES: Input Variables to be mentioned in this Table				
Variable Name	Type	Mandatory	Purpose	Example Input
N/A	N/A	N/A	N/A	N/A

---

## 4. Support & FAQs

---

### 4.1 Support

Free bots are not officially supported. You can get access to Community Support through the following channels:

- You can get access to Community Support, connecting with other Automation Anywhere customers and developers on [APeople](#) – the [Bot Building Forum](#), the [Bot Store Support Forum](#), or the [Developers Everywhere Group](#).
- Automation Anywhere also provides a [Product Documentation portal](#) which can be accessed for more information about our products and guidance on [Enterprise A2019](#).

### 4.2 FAQs

For questions relating to Enterprise A2019: See the [Enterprise A2019 FAQs](#).
