

USER MANAGEMENT BOT

BOT DESCRIPTION:

This bot allows users to create a new user or delete an existing user from Control Room in a much quicker way.

BOT DETAILS:

1. APIMaster
2. InputDetails
3. DeleteUser
4. **LicenseApprovalProcess**

Upon downloading the bot, the user must click on LicenseApprovalProcess form and run the process.

The bot opens a form to fill in the details. Mandatory fields like username, email and type of license should be filled in for the bot to run.

The form looks as pictured below.

The screenshot shows a web form titled "LicenseApprovalProcess" with a subtitle "Provide request information" and a close button (X) in the top right corner. The form contains several input fields and a dropdown menu, organized in two columns. The first column lists the labels for the fields, and the second column shows the corresponding input elements. The "User ID" field is a text input with a red asterisk, and its value "Userid" is displayed above the input box. The "First Name" field is a text input with the label "FName" above it. The "Last Name" field is a text input with the label "LName" above it. The "Email" field is a text input with a red asterisk, and its value "Email" is displayed above the input box. The "License For" field is a dropdown menu with the label "LicenseType" above it, and the selected value "DEVELOPMENT" is displayed below the dropdown arrow. The "Access Type" field is a text input with a red asterisk, and its value "AccessType" is displayed above the input box. At the bottom right of the form, there are two buttons: "Back" and "Submit".

Field Label	Field Name / Value
User ID	Userid *
First Name	FName
Last Name	LName
Email	Email *
License For	LicenseType *
Access Type ⓘ	AccessType *
