# 1. Introduction

---

This document contains all essential information for the user to make full use of this A2019 [\(Bot/Command Package\)](#). It includes a description of the functions and capabilities and step-by-step procedures for setup & configuration of the [\(Bot/Command Package\)](#).

## 1.1 Overview

This bot is designed to convert an xml file to an Excel file for further analysis using a python script. The user provides both XML input file and the Excel output file paths inside the python script.

## 1.2 Use cases

The key use cases include:

- Insert xml file path to a python script
- Converts xml file to an excel file
- Stores the output excel file path in a specific path
- The converted file will be in .xlsx format

---

## 2. Requirements & Prerequisites

---

### 2.1 System Requirements

#### [Enterprise A2019 \(Cloud deployed\) and Community Edition device requirements.](#)

Review the machine hardware specifications, operating system versions, and browser types supported by Automation Anywhere Enterprise for creating and running bots and command packages as an Enterprise A2019 (Cloud deployed) or Community Edition user on your local machine.

### 2.2 Prerequisites

1. Automation anywhere enterprise A2019 installed.
2. Python 3.8.x must be installed. [Install from here.](#)

---

## 3. Getting Started

---

### 3.1 Quick Start

#### 3.1.1 Configuration and Use

Actions:

- **Python script: Open**
  - Select the 'Manual Input' option and insert the python script
  - Change the xml input file path on line 7 of the script to the path where the xml file exists
  - Change the excel output file path on line 20 where the excel output file should be inserted
  - Leave the python session as 'Default'
- **Python script: Execute Script**
  - Leave the python session as 'Default'
  - Assign the output variable to a '**SampleString**' variable (it only verifies if the script was well executed or not:
    - \*\* If it's well executed, it returns → True
    - \*\* If not, it returns → False
- **Message box:**
  - To verify if the script was well executed by entering the '**SampleString**' variable
- **Python script: close**
  - To close the python script, keeping the python session as 'Default'

---

## 4. Support & FAQs

---

### 4.1 Support

Free bots are not officially supported. You can get access to Community Support through the following channels:

- You can get access to Community Support, connecting with other Automation Anywhere customers and developers on [APeople](#) – the [Bot Building Forum](#), the [Bot Store Support Forum](#), or the [Developers Everywhere Group](#).
- Automation Anywhere also provides a [Product Documentation portal](#) which can be accessed for more information about our products and guidance on [Enterprise A2019](#).

### 4.2 FAQs

For questions relating to Enterprise A2019: See the [Enterprise A2019 FAQs](#).

---

## Appendix A: Record of Changes

*Instructions: Provide information on the version number, the date of the version, the author/owner of the version, and a brief description of the reason for creating the revised version.*

No.	Version Number	Date of Change	Author	Notes
