1. Introduction

This document contains all the essential information for the user to make full use of this A360 Bot. It includes a description of the functions and capabilities and step-by-step procedures for the setup & configuration of the Bot.

1.1 Overview

The purpose of this bot is to standardize the notifications sent out via email for every bot.

1.2 Use cases

This will provide really useful for RPA development as it presents a simple way to preset different type of alerts, according to the specific needs of the developer.

2. Requirements & Prerequisites

2.1 System Requirements

[Enterprise A360 \(Cloud deployed\) and Community Edition device requirements.](#)

Review the machine hardware specifications, operating system versions, and browser types supported by Automation Anywhere Enterprise for creating and running bots and command packages as an Enterprise A360 (Cloud deployed) or Community Edition user on your local machine.

2.2 Prerequisites

- Windows OS
- Outlook

3. Getting Started

3.1 Quick Start

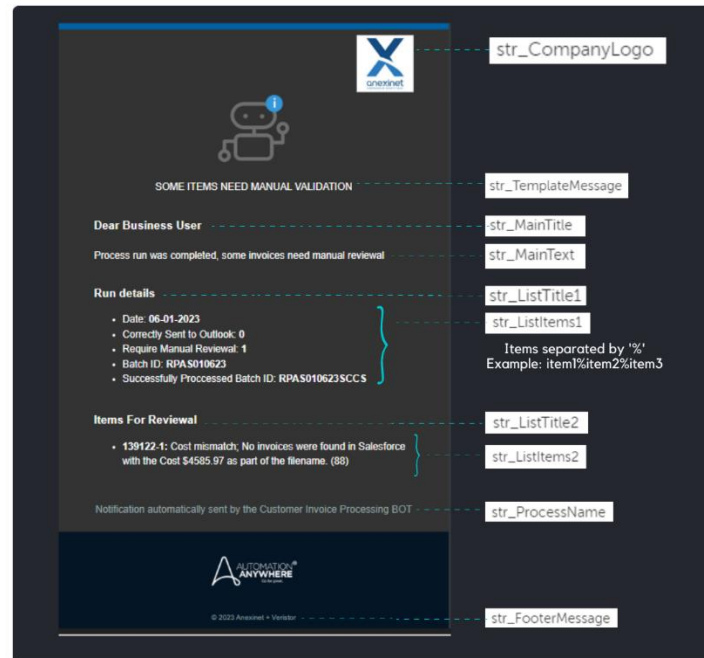

3.1.1 Setup

Download and Add the bot to your control room workspace

3.1.2 Configuration and Use

- Step 1: Setup the Bot Variables

The following are the variables the bot has and which they represent. The ones not included on the picture below are your standard variables such as email address, email recipient, attachment, subject, cc and bcc.

- Step 2: Integrate bot

Call the Bot from your main task and run it, with the variables configured.

4. Support & FAQs

4.1 Support

Free bots are not officially supported. You can get access to Community Support through the following channels:

- You can get access to Community Support, connecting with other Automation Anywhere customers and developers on [APeople](#) – the [Bot Building Forum](#), the [Bot Store Support Forum](#), or the [Developers Everywhere Group](#).
- Automation Anywhere also provides a [Product Documentation portal](#) which can be accessed for more information about our products and guidance on [Enterprise A2019](#).

4.2 FAQs

What happens if I leave some input variables empty?

The bot will execute and if those variables are non-mandatory the email will have some blank spaces.

For questions relating to Enterprise A2019: See the [Enterprise A2019 FAQs](#).

Appendix A: Record of Changes

No.	Version Number	Date of Change	Author	Notes
1	<i>1.0</i>	<i>04/18/2023</i>	<i>Lucas N. Morral</i>	<i>First Deployment</i>
