1. Introduction

This document contains all the essential information for the user to make full use of this A360 Bot. It includes a description of the functions and capabilities and step-by-step procedures for the setup & configuration of the Bot.

1.1 Overview

This bot will check if the files are existing in the specified folder path. If the files are existing, then before copying the files from the output folder to the Archival folder, it will create a new folder in the archival with the current date & time stamp. Then it will copy the files to the newly created date & time stamp folder and then it will delete the files from the output folder.

1.2 Use cases

2. Requirements & Prerequisites

2.1 System Requirements

[Enterprise A2019 \(Cloud deployed\) and Community Edition device requirements.](#)

Review the machine hardware specifications, operating system versions, and browser types Automation Anywhere Enterprise supports creating and running bots and command packages as an Enterprise A2019 (Cloud deployed) or Community Edition user on your local machine.

2.2 Prerequisites

1. *User should have an A2019 installed to take benefit of this automation.*
2. *User should be using a Folder package.*
3. *User should be using a File package.*
4. User should be using a Loop package
5. The files should be existing in the specified folder.

3. Getting Started

3.1 Quick Start

3.1.1 Configuration and Use

1. Download the Bot from the Bot-store.
2. Check the downloaded bot in your local machine's private/Public section.
3. Once Bot is downloaded, you are ready for a run.
4. *Create an archival folder with the date- time.*
5. *Copy files from the specified folder to a created date-time folder inside the Archival folder.*

○ **For Configuring the Bot –**
